
Project

NCM Headquarters

Location

Cardiff Bay

Accommodation

107,000 sq ft

Value

£12m

Client

Grosvenor Waterside Plc

Following initial assignments to develop the brief for NCM and to advise on site selection, Holder Mathias was responsible for the design and construction of this award winning building. The design, which provides approximately 107,000 sq ft of offices with an undercroft accommodating 92 cars, is centered around a central atrium providing efficient circulation and operational conditions. The concept reflects the culture of the company and its requirement for a 'remarkable and timeless building'.

The building is located in a prime position on the water's edge of the Inner Harbour and the design takes its influence from the maritime setting. It was awarded an RIBA commendation and Eisteddfod Gold Medal.
