

Project

New entrance and concourse for the University Hospital of Wales

Location

Cardiff

Accommodation

Reception and car parking, admin, retail and restaurant

Value

£2.5m

Client

National Health Hospitals

Holder Mathias designed the new concourse providing an active and vibrant new main entrance to the Heath Hospital and its outpatients department.

The new building has a dramatic standing-seam roof which, with its supporting cables, gives the impression of a 'big top'.

The project is one of the first major NHS developments to be completed in Wales under the Public Finance Initiative and is now an important income generator.
