

Project

Primary Health Resource
Centre

Location

Connah's Quay, North Wales

Accommodation

A privately funded Health
Centre in collaboration with
the local Primary Care Trust

Client

Haven Health Properties Ltd

Holder Mathias Architects was commissioned by Haven Health Properties Limited to evolve a concept for the development of Primary Care Resource Centres. Connah's Quay is one of a series currently being designed and built as part of a development programme throughout Wales. The following key principles formed the basis of the initiated design concept and are rigorously being promoted on all schemes.

- Appropriate response to site context.
- Creation of 'World Class' facility in a 'Landmark' building.
- Integration of users and sectors with shared spaces to evolve a building 'Community'.
- Passive environmental principles employed where possible.
- Development to achieve an N.E.A.T. excellent rating.
- Overcoming confidentiality issues between clinical spaces whilst still maintaining a comfortable environment.
